EDUCATION

Vellore Institute of Technology   *2021 - 2025*
BTech. Computer Science and Engineering with Specialisation in Internet of Things   CGPA = 9.21/10

TECHNICAL SKILLS

Languages: Javascript, Typescript, Python, C, Go
Libraries/Frameworks: React, Vue, Svelte, Gatsby, Next.js, Node.js, Django (DRF), FastAPI, React Native
Dev Tools: GitHub Actions, Docker, Postman
Platforms: GitHub Pages, Vercel, Netlify, Heroku, Strapi
Databases: PostgreSQL, MySQL, MongoDB
Misc.: Agora (for webRTC), socket.io, Framer Motion, Algorand, phaser.js, Three.js, Tailwind, Storybook.js

WORK EXPERIENCE

Frontend Development Intern (React.js, Storybook.js, Strapi)   *September 2022 - December 2022*
reunion
● Developed a zero-and-higher level UI-component library using Storybook.js in collaboration with a team, and set up a central styling control with data from Strapi. Created a subscription form for a real-estate info service.

Software Development Intern (React.js, React Native, Shopify)   *May 2023 - Present*
Credanic
● Built production-grade cross-platform mobile applications, and developed a Shopify store for an ecommerce platform.

VOLUNTEERSHIP EXPERIENCE

Core Member   *March 2022 - Present*
GDSC (Google Developer Student Clubs) VIT Vellore
● Worked on projects and participated in hackathons as a part of the Tech domain.
● Held informative sessions for students on topics such as socket programming.
● Helped organise hackathons such as WomenTechies '22, '23 and DevJams '22.

PROJECTS

Frontend Developer (Next.js, redux, framer.motion)   *Jan 2023 - Feb 2023*
Riviera 2023 (Web) (GitHub, Live Site)
● The website for one of the largest college fests in India, held at VIT, Vellore, with over 30,000 students from 650+ colleges.

Full Stack Developer (phaserjs, React.js, socket.io, redux, Node.js)   *Nov 2022 - Present*
Unnamed Meet App
● An ongoing project which aims to combine a 2D virtual RPG-like game experience with traditional chat and video communication to facilitate immersive online meetings and gatherings.

Frontend Developer (Svelte)   *May 2022 - August 2022*
Code2Doc Frontend (GitHub)
● A web app built with a team of developers and designers for converting code files to documents with a single click. Developed a user-friendly and responsive PWA using in-house CSS and a handrolled drag-and-drop file interface. Made multiple API integrations.

Frontend Developer (React.js, redux)   *April 2022 - August 2022*
GDSC Ideas Hub Frontend (GitHub, Live Site)
● An idea discussion portal built for GDSC-VIT. I coordinated with a designer and a backend developer to build this site, which is designed to hold hundreds of ideas submitted by users, along with a status tracking, commenting and notification system. Developed a responsive web app using Google OAuth, Redux and integration with a CRUD API.

Full Stack Developer (MERN Stack, Mantine)   *February 2022 - March 2022*
anibin. (GitHub)

Full Stack Developer (Vue.js, PostgreSQL, Django)   *December 2021 - January 2022*
spaceQuery (GitHub)
